## CONDITION OF THE MARKETS

Decline in Speculative Wheat, with Closing Prices Over a Cent Lower.

Immense Business in Corn, with Weaker Feeling Caused by Rains-Oats Steady-Hog Products Unsettled and Easier.

MONEY, STOCKS AND BONDS.

The Market Still Firm but Intensely Dull-

Drop in Sugar Trust. NEW YORK, July 15.-Money on call was easy, ranging from 4 to 412 per cent, the last loan being made at 4, closing offered at

4 per cent. Prime mercantile paper 5@7 per cent. Sterling exchange dull and steady at \$4.8412 for sixty-day bills and \$4.89 for de-

The total sales of stocks to-day were 116,-750 shares, including the following: Atchison, 3,300; Delaware, Lackawanns & Western, 4,750; St. Paul, 11,732; Reading, 3,500.

The faith of the "bulls" in the power of the silver bill to revive the almost morispeculation was shown again in the firm to strong front presented by the stock market this morning, but the conservative spirit cropped out in the dullness, which continued without break throughout the day, as the effect of the fear of further gold shipments this week. These factors at present seem to control the course of the market, both as to prices and activity. The raid upon Rock Island is without explanation. The feeling upon the grangers is improving, and is earnings from the large crops soon to come to market over those lines. Those stocks show all the feature there is in the market at present, and continue to show the most firmness, though subjected to some pressure. The general list throughout the day failed to move, but the opening gains were sufficient to cause most stocks to close slightly higher than last evening. The pressure upon Sugar was on the circulation of rumors pointing to the further litigation and possible disruption of the trust. It is the only stock which shows a material decline, its loss being 134 per cent.

Railroad bonds showed a little more animation and the sales of all issues reached \$1,021,000, which was distributed among a greater number of issues than usual of late, while there was no feature of interest. The tone remained firm, but the final changes were for insignificant fractions. St. Lous & New Orleans fives rose 2 to 120.

## TRADING AT CHICAGO.

Sharp Break in Wheat-Corn Lower-Oats

Steady-Hog Products Weaker. CHICAGO, July 15 .- A moderate business in wheat was transacted at weak and lower prices. The opening was 34@1c lower than yesterday's closing, rallied 3sc, again became weak, selling off 12@34c, or inside prices of the day, and closed about 1c lower for August, 140 lower for September and 11so lower for December than closing figures yesterday. The decline was attributed to the change in the weather in England, ad-

vices noting rising barometer and fine

weather for growing ( ) lower cables and the receipts of some selling orders. In corn there was another good day's trade, and though fluctuations did not cover a very wide range the volume of business was immense. The feeling developed was weaker, and lower prices were the rule in all futures. There were large selling or-ders on the market from the West, the weaker tone was due to re-of rain in the corn belt. The market opened 34@78c under the closing prices of yesterday, was easy and sold off 38@12c, rallied, selling up 58@78c, ruled steady and closed 12@34c lower than yes-terday. Oats was moderately active and steady within a range of 14c. Crop reports are not as favorable as farmers would like and the indications now point to a shortage of 100,000,000 bu from last year's crop. In mess pork a dull, weaker, unsettled feeling prevailed. Prices declined 20@25 on the near and 5@10c on the more deferred deliveries and the market closed quiet. Less interest was manifested in lard. Prices declined about .0212c and closed rather quiet. In short ribs an easier feeling prevailed. Prices declined .05@.0712c and the market closed steady. The leading futures

Market fair at yesterday's prices. BUFFALO, July 15.—Cattle quiet. Receipts, 38 car-loads through; no sales. Sheep and lambs quiet. Receipts, 10 carloads through and 2 car-loads for sale. Hogs dull and unchanged. Receipts, 11 car-loads through and 9 car-loads for sale.

## INDIANAPOLIS MARKETS.

Trade Good for July with Prices Firm as a Rule.

INDIANAPOLIS, July 15. Inquiry in the different branches of business shows the volume of trade is very satisfactory for the middle of July and decidedly in excess of the corresponding period last year, and with this prices carry a remarkably strong tone. Especially is this true of dry goods and groceries. The hide and leather markets, as well, are both in strong position. With the commission men there is no accumulations of stocks unless it be of butter. Poultry is firm at the advance of Monday, and everything in the vegetable line has an advancing tendency. Green apples are in large de-mand but light in supply. The same is true of Irish potatoes. Watermelons are in abundant supply, most of them coming from nearer home than last week, the Georgia melons being about off the market.

The local market was less active to-day. Wheat took on an easier tone; corn and oats are in a stronger position than on Monday. Track bids to-day ruled as follows: Wheat-No. 2 red, 85c; No. 3 red, 80c; re-

jected, 68c; unmerchantable, 50@60c; July, 86c; August, 85c; September, 87c. Corn-No. 1 white, 37c; No. 2 white, 37c; No. 3 white, 36c; No. 4 white, 33c; No. 2 yellow, 36<sup>1</sup>2c; No. 3 yellow, 36<sup>1</sup>2c; No. 4 yellow, 32c; No. 2 mixed, 36c; No. 3 mixed, 36c; No. 4 mixed, 31c; mixed ear, 34c; yellow, 86c; choice white, 37c. Oats-Light receipts; No. 2 white, 3512e; No. 3 white, 3212c; No. 2 mixed, 35c; re-

jected, 31c. Bran - Receipts light; local deal bidding \$10. Hay-Timothy, choice, \$14; No. 1, \$13.50; No. 2, \$7@8; No. 1 prairie, \$6.75

Indianapolis Jobbing Trade. CANNED GOODS. Peaches—Standard 3-pound, \$2.25@2.50; 3-pound seconds, \$1.65@1.75. Miscellaneous—Blackberries, 2-pound, 80@90c; raspberries, 2-pound, 90c@\$1; pineapple, standard, 2-pound, \$1.40@2.50; seconds, 2-pound, \$1.10

@1.20; cove oysters, 1-pound, full weight, \$1.10@1.15; light, 70@75c; 2-pound, full, \$2@2.10; light, \$1.10@1.15; string beans, 85@95c;

Lima beans, \$1,20@1.30; peas, marrowfat,

\$1.20@1.40; small, \$1.50@1.75; lobsters, \$1.85 @2; red cherries, 95c@1.10; strawberries, \$1.20@1.30; salmon (fbs), \$1.90@2.50. DRY GOODS.

### The Digestibility of Fats. Table Talk.

If our admiring reader would have asked us in what form fats were positively unwholesome, and an abomination unto the Lord, we would have quickly answered, when floating on the top of gravies, soups or stews; and in this way, I am sorry to say. we meet them every day. The perfectly healthy stomach of a laboring man, a farmer, or a wood-chopper will, during the cold months, digest beef or mutton fat; but to the man of sedentary habits, it is almost an impossibility. Things to taste well, must always look well. This I insist upon, and a soup covered with fat is so unpleasant to the eye, that it robs one of his appetite the moment it is seen. Well-cooked meat is more easily digested than the oils of fat produced by longer cooking. By well-cooked fat we do not mean that on the outside of roasted, baked or broiled meats, but the under-layers. The surface of all meat cooked in an intense, dry heat is apt to be over-done. The action of the heat on the over-done. The action of the heat on the fat produces irritant fatty acids; and it is these which disagree, rather than the lean meat. This difficulty, as you know, rarely occurs in broiled meats, where the temperature in cooking does not run so high. Fat is essential to the maintenance of healthy nutrition; but it is difficult to make the ordinary house-keeper understand the difference between the healtful and unhealthful fats. Perhaps the same woman who serves ful fats. Perhaps the same woman who serves an inch to an inch and a half of the most abomidable fat on top of her roasted beef gravy, will shudder at the suggestion of a well-made French dressing for her salads. The nutritiousness of meats does not de pend upon the amount of fat they contain, but upon the fibrine, blood and juices. Fat is a heat and force producer, but does not repair or build our muscles, nerves for brains. The Esquimau or Laplander consumes large quantities of oil, by the combustion of which he withstands the intense cold of his climate; but in this and milder climates less fat is required. Butter, if not melted, is easily digested. Olive oil and the well-cooked fats on meats should be taken in moderation. Gravies should be thoroughly skimmed, and only a sufficient quantity of fat used to thoroughly amalgamate with the flour and water. Soups should be made the day before they are required for use, so that the fat may come to the surface, congeal, and be entirely removed. The following is the proper way to make a good, wholesome roast beef gravy.

After the meat is done transfer it from

the pan to the serving dish and pour off all the fat but about two tablespoonfuls, carefully reserving the brown sediment in the bottom of the pan; add two level table-spoonfuls of flour to the fat remaining in the pan; mix over the fire until a good brown, then add quickly three gills of hot water, stir continually until boiling; scrape the sides and bottom of the pan that not a particle of the osmazome may be lost. Season with salt and pepper, and serve. If these directions are carefully followed,

a rich, dark brown gravy will be the result; and not a trace of fat will be found on its surface.

Hens as an Aid to Peach-Raising. Springfield Republican.

Farmers in Connecticut have for several years past been at work reviving an old industry—the growing of peaches for market. Fifty years ago the peach crop of the Nutmeg State was an important item; but the trees ran out after a time, the orchards were cut down and apples and other small fruits took their place. After giving the land a long rest the industry was revived again about ten or twelve years ago, and each succeeding year the peach premiums at the several agricultural fairs have been increased in importance until they have drawn out some of the finest samples of the fruit raised north of Mason and Dixon's line, As to cultivation, there are as many methods as there are individual growers. The simplest was that practiced by William Platt, of Newtown, a formerly very successful grower. Mr. Platt used to spade up a circle around each tree of perhaps three feet in diameter. Into this he planted or sowed, very sparingly, corn, oats, buckwhat and other cereals. Then he turned his large flock of hens into the orchard and let them scratch for their living. He claimed that by this method he kept the earth about the roots of the tree loose and easily permeable by rain and dew, and the hens, besides gathering the corn and oats, acted as insect and worm destroyers, keeping the trunks of the trees free from borers and other pests, which would otherwise have to be looked after with a sharp eye. Mr. Platt which gained him a wide fame.

## Making Gravy.

Germantown Telegraph. Few housewives, although otherwise good cooks, can make good gravy. There is either a raw taste about it or it contains too much grease. A jar of browned flour should always be kept on hand for both gravy and soup-making, as it gives to it a much better color and flavor than white flour. To prepare it put as much as you wish, say a pint or quart of white flour, into a skillet, and set it on top of the stove or in the baker and stir every few minutes to prevent scorching or burning until it becomes a light brown. When cool place in a self-sealing jar or can, and it is ready

In roasting almost any kind of meat, with the exception of veal and poultry, pour off all the contents of the roastingpan some twenty minutes before meal-time. When the grease rises to the top, and gets cool enough to skim off, remove it, and place the pan containing the liquor that is at the bottom of it on the stove. As soon as it boils, stir into it a little of the browned flour, wet; let it boil again, and it is ready for use, as it is usually well seasoned with both pepper and salt that drips from the meat. For yeal gravy, a little more water will have to be added when the meat is cooking. The grease will not need to be skimmed off, but a small lump of butter added, then proceed as above. For poultry, boil the giblets in a little water by themselves. After they are

done, take out, chop up and return to the water. Season with pepper, sait, but-ter and the wet browned flour, and add any herbs you wish.
